Summary

Backend & Automation Engineer with 6+ years of experience across the full software development lifecycle, designing scalable backend systems, RESTful APIs and microservices with Java (Spring Boot), Python and Node.js. Specialized in business process automation and large-scale Python web scraping and data pipelines that replace manual operations with reliable software. Former Technical Lead with a Database Specialization (relational and NoSQL), experienced in guiding teams from architecture to secure production deployment.

Experience

Hitch — Backend & Automation Engineer Remote
Fullstack Developer 2023 – Present

- Deliver end-to-end backend and automation solutions for multiple clients across the full software development lifecycle, owning architecture, development, deployment and production support.
- Designed scalable backend architectures and microservices in Java (Spring Boot) and Firebase/Firestore, exposing high-performance, secure RESTful APIs consumed by web and mobile clients.
- Built web scraping and data extraction pipelines in Python (Selenium, headless Chrome) and Java (Jsoup) that synchronize product, pricing and social media data from dozens of sources, with anti-bot handling and parallel processing.
- Integrated AI models (LLM APIs) to automate product categorization and specification extraction, reducing manual data.
- Automated business workflows and third-party integrations, saving clients approximately 10 hours of manual work per week.
- Led development teams of 4 engineers, driving code reviews, task planning and key technical decisions.

Geometry Latam Remote
Technical Lead / Deputy Technical Lead 2022 – 2023

- Led a complete software product from conception to production deployment, coordinating technical decisions across the team.
- Designed the database architecture and built a REST API with Node.js and Firebase to connect system components and automate data exchange.

Siscómputo Ltda. Colombia
Backend Developer / Technical Lead 2022 – 2022

- Led development of accounting and business management applications, owning backend architecture, API design and process automation.
- Built scalable services with Java (Spring Boot) and Firebase supporting financial transactions, accounting workflows, data synchronization and secure external integrations.
- Developed responsive web and mobile interfaces with Next.js (PWA) and Flutter, improving operational efficiency for business users.

Education

Universidad Pedagógica y Tecnológica de Colombia (UPTC) Tunja, Boyacá
Specialization in Databases 2023 – 2024

Universidad Pedagógica y Tecnológica de Colombia (UPTC) Tunja, Boyacá
B.S. in Systems and Computer Engineering 2017 – 2023

Instituto Integrado Carlos Arturo Torres Peña Santa Rosa de Viterbo, Boyacá
Technical High School Diploma in Systems 2015

Academic Projects

[Nombre del proyecto] — C# .NET Application UPTC, [año]

- Developed [breve descripción del proyecto] with C# .NET, applying object-oriented design, layered architecture and relational database integration (SQL).

Skills

Languages: Python, Java, C#, JavaScript, TypeScript, SQL
Backend: Spring Boot (Java), Node.js, RESTful API & microservices design; C# .NET (academic projects)
Databases: MySQL, PostgreSQL, Firebase/Firestore, MongoDB (relational & NoSQL)
Cloud & DevOps: AWS, Firebase, Linux servers
Version Control & Security: Git/GitHub, code reviews, secure API design, information security fundamentals
Automation & Data: Python web scraping (Selenium, headless Chrome), data pipelines, AI/LLM integration
Frontend: React, Next.js, Angular, Flutter
